Summary

Frontend engineer building high-performance web applications using Next.js and React. Experienced in complex dashboards, interactive 3D experiences, and production e-commerce systems. Strong focus on performance optimization, scalable UI architecture, and Core Web Vitals.

Experience

Software Development Engineer (SDE 1) — Fordel Studios

Feb 2025 – Present

- Led frontend development for production Next.js applications.
- Integrated payment gateways and map APIs into optimized UI workflows.
- Improved Core Web Vitals, reducing LCP by 40%.
- Built reusable, responsive UI systems with Tailwind CSS.

Full Stack Developer Intern — Fordel Studios

Aug 2024 – Jan 2025

- Delivered responsive frontend features for live e-commerce platforms.
- Refactored legacy React codebases using hooks and modern state management.

Projects

PathSathi — Interactive Travel Platform

- Built scroll-driven storytelling experience using GSAP and Lenis.
- Integrated interactive map components with smooth animations.
- Optimized rendering for consistent 60fps mobile performance.
- Stack: Next.js 14, GSAP, Framer Motion, Firebase

The Formula Shop — E-commerce Platform

- Shipped production e-commerce platform with 300+ SKUs.
- Implemented client-side caching and optimized cart flows.
- Achieved sub-2s page loads and 90+ Lighthouse scores.
- Stack: Next.js, Tailwind CSS, Redux Toolkit

Astra Terra Properties — Real Estate Platform

- Built map-based property search with dynamic clustering.
- Implemented advanced filtering and animated property transitions.
- Stack: Next.js, TypeScript, GSAP, Leaflet

Vayuroom — Privacy-First WebRTC Video Platform

- Built a zero-knowledge, end-to-end encrypted video conferencing platform using WebRTC and DTLS-SRTP.
- Implemented ephemeral signaling via Firebase Realtime Database with no persistent storage of user data.
- Designed a custom mesh-network signaling protocol for small-group P2P calls without a central media server.
- Stack: React, WebRTC, Firebase, TypeScript, Cryptography (E2EE)

Wowfy — 3D Portfolio

- Developed immersive 3D portfolio using React Three Fiber.
- Implemented interactive scenes and animation flows.
- Stack: React, Three.js, Framer Motion

Technical Skills

Frontend: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+)

UI & Animation: Tailwind CSS, GSAP, Framer Motion, SCSS

State: Redux Toolkit, Zustand, Context API

Performance: Web Vitals Optimization, Code Splitting, Lazy Loading

Backend Familiarity: Golang, Node.js, Firebase, REST APIs **Mobile Familiarity:** Flutter (Dart), Swift

Education

University of North Bengal — BCA

Expected May 2026
